P.W. Stalkomat Sp. z o.o. was established in 1992. Our company deals with designing and manufacturing technological transport devices, more known as ropes. We have a long-term experience in their production, because we are continuing the tradition of SOS SOSTAL from which we originate. Typical wire, chain, polyester or webbing sling ropes are manufactured according to PN-EN regulations and have the WLL and length according to customer's needs. We also produce lifting beams, metal tongs, plate tongs, metal sheet lifters, manhole housing lifters etc. We design and build according to our customers' individual needs on the basis of obligatory norms, endurance calculations and using the appropriate standards of Dyrektywa Maszynowa 2006/42/WE. Each rope or a group of equal ropes receives The Certificate of Quality or The Declaration of Conformity with obligatory norms and a CE mark. We also offer help in choosing ropes and in re-attestation and regeneration of used ropes. With our company- **YOU WORK WITHOUT RISK !!!**

## HOOKS FOR LINE HOISTS, FOR PULLING CARRIAGES

*Hook's lifting capacity 5,0t*  
*We offer the following set:*  
**HOOK—SHACKLE—THIMBLE**

## TRIPOD FOR HANGING HOISTS

*Tripod is equipped in the regulation of pods' height and width spacing. To the upper part a swivel hook is connected on which one can hang a hoist or a rope.*

*The tripod occurs very useful when building wells, manholes, setting concrete rings itp.*

*Lifting Capacity—1,0t, 1,5t, 2,0t*
