

LINE ROPES

LINE ROPES

P.W. Stalkomat Sp. z o.o. was established in 1992. Our company deals with designing and manufacturing technological transport devices, more known as ropes. We have a long-term experience in their production, because we are continuing the tradition of SOS SOSTAL from which we originate. Typical wire, chain, polyester or webbing sling ropes are manufactured according to PN-EN regulations and have the WLL and length according to customer's needs. We also produce lifting beams, metal tongs, plate tongs, metal sheet lifters, manhole housing lifters etc. We design and build according to our customers' individual needs on the basis of obligatory norms, endurance calculations and using the appropriate standards of Dyrektywa Maszynowa 2006/42/WE. Each rope or a group of equal ropes receives The Certificate of Quality or The Declaration of Conformity with obligatory norms and a CE mark. We also offer help in choosing ropes and in re-attestation and regeneration of used ropes. With our company- **YOU WORK WITHOUT RISK !!!**

LINE ROPES

LINE ROPES TYPES (1-TIED LINE ROPES)

TAKING INTO ACCOUNT THE TYPE OF THE LINE

1. manufactured according to PN-EN 13414-1 from steel lines having a minimal endurance of wire strength in the string of $R_m = 1770 \text{ Mpa/min}$ or 1960 Mpa/min

2. manufactured according to PN-89/M-84732 :1994 having $R_m = 1570$ or 1770 Mpa/min

TAKING INTO ACCOUNT THE WAY THE LOOPS ARE MADE

„ S „ TYPE
With braided
loops

„ F „ TYPE
With loops
tightened with
cylindrical
sleeves

„ Fv „ TYPE
With loops
tightened with
conical
sleeves
